

TECH STUDIO - EST. 2019

We build the products other companies get famous for.

Kalkey is a product studio. We take an idea from a napkin sketch to a shipped web platform, mobile app, or AI feature — and we put our name on the work.

WHAT WE DO

Four disciplines, one team that ships.

Web Development

High-performance websites, web apps, and platforms built to scale — from marketplaces to dashboards.

Mobile App Development

Native and cross-platform iOS & Android apps with smooth UX and rock-solid architecture.

UI/UX Design

Research-driven product design, branding, and prototyping that turns ideas into experiences people love.

AI / ML Solutions

Intelligent features — recognition, recommendations, automation — engineered into real products.

PEOPLE ON THE TEAM

WHY KALKEY

We act like founders, not a vendor.

Outcome-obsessed

We measure success by what your product does in the market, not by hours billed.

Full-stack under one roof

Strategy, design, engineering, and AI — no hand-offs between agencies.

Built to ship fast

Tight feedback loops and a bias for shipping get you to real users sooner.

LET'S BUILD

Have something worth shipping?

Tell us what you're building. We'll tell you how we'd ship it — and put our name next to yours.
